NEOCLEAR MANDELIC ACID PEEL

20% Professional Treatment

A gentle yet effective mandelic acid peel that resurfaces acne and rosacea-prone skin while supporting barrier comfort. This streamlined formula refines the look of uneven texture, congestion, and post-breakout discoloration with little to no visible peeling. Safe for all Fitzpatrick skin types.

DERMATOLOGIST RECOMMENDED

Sizes: 60mL

HOW TO USE

Cleanse skin with Cleanser, degrease thoroughly with witch hazel, and protect mucous membranes with MB-2. Dispense 2 to 4 full droppers into a bowl and apply a thin, even layer with a mask brush. Leave on for up to 5 minutes, then remove completely with NeoNeutralizer.

For enhanced results, apply a second layer before neutralizing. Follow with extractions, modalities, a hydrating mask, or lymphatic drainage massage. Finish with Recovery and Barrier Renewal Cream. Daily SPF use is required following treatment.

KEY INGREDIENTS

Mandelic Acid
Gently exfoliates to refine skin texture, improve post-inflammatory hyperpigmentation, and promote a more even tone, with minimal risk of irritation.

Propanediol
Delivers lightweight hydration and helps reduce transepidermal water loss, supporting the barrier so skin stays comfortable throughout resurfacing.

Glycerin
Clinically shown to increase skin hydration, reduce transepidermal water loss and itching, and enhance barrier recovery for smoother, more resilient skin. It also is a prebiotic which feeds symbiotic bacteria.

BENEFITS

Controlled Resurfacing
Mandelic acid's larger molecular size allows slower, more even exfoliation, well suited for sensitive and reactive skin.

–

Clarity + Even Tone
Lifts away surface buildup to soften the look of congestion, blemishes, and uneven tone.

–

Clean Pro Formula
Short ingredient deck at 20% mandelic acid, safe for all Fitzpatrick skin types with little to no downtime.

INGREDIENTS

Water, Mandelic Acid, Glycerin, Propanediol, Potassium Citrate, Gluconolactone, Sodium PCA, Xanthan Gum, Sodium Benzoate, Glyceryl Polyacrylate, Chinese Senna (Cassia Obtusifolia) Seed Extract.
