BURN

"My client was boiling water for coffee when the pot slipped and the scalding water burned her hands and feet.

She used Recovery diligently and did LED treatments at home. She is thrilled with the results."

– Christy Mitchell

PROTOCOL:

Recovery – 2x Daily

LED Light at home for 2-4 weeks

BURN

"I was helping a friend out and her boyfriend's motorcycle had just been pulled into the garage. I wasn't paying attention and got my left lateral calf up against the tailpipe and because I didn't realize it was hot (thought it was sharp), it caused a double ring second degree burn to my leg.

I self-treated this with Bacitracin and Silvadene until 6/18/19 when I went to urgent care because it started showing signs of infection in the deepest parts. I started antibiotics but started having side effects from these within a couple days.

On 6/20/19, I was given a small bottle (3oz size) of NeoGenesis Recovery and immediately started using it. Within a couple of applications, I had significant reduction in discomfort and could visibly see improvement. I am so blown away at the amount of progress that has occurred in the 6 days since beginning this product and because the new tissue looks so good, I'm hopeful the scarring will be minimal. 11 days later and the wound is nearly completely closed. I am a nurse and saw firsthand how this product worked on a close family friend for her bed sores at the end of life.

Wound care providers need to know this product exists. As I've researched this product more, I am excited to explore its other applications (I also have rosacea!)" – J

BURN

“I used NeoGenesis Recovery serum a few times a day in the beginning each time the burn felt irritated. Now I am just using it twice a day. Pictures don’t do it justice. The burn was so bad it was oozing, swollen and throbbing. It was awful for a few days.” – DP

BURN

“I am a mechanic and I occasionally burn myself while working. Recently I got a severe burn on my thumb while working. I have had similar burns before and they usually end up with the blisters breaking, sometimes scabbing over, but always painful to any pressure or touch until completely healed. The skin also usually peels off in strips and pieces and takes with it unaffected skin next to the burn.

The NeoGenesis product Recovery seemed to help the burn from underneath, and after day 10 the skin was still intact with no peeling. The skin of the affected area is also softening daily.

I am so grateful that my friend turned me on to these amazing products!” – M

BURN

“I experienced a second-degree hot oil burn on my thigh in October 2016. The area was healing, but I did not like the look of the scar that was forming.

A friend of mine recommended NeoGenesis’ Recovery serum and I am so thankful that she did.

I have been using the Recovery serum twice a day and I am loving the results! I am not stopping. I see normal pigment now returning! I am so excited!

Thank you for making such an amazing product.” – IC
