FRAXEL LASER SCAR

“My year old fraxel laser scar disappeared after using Recovery for only 30 days!

I thought I would be using makeup to hide it for the rest of my life. Amazing!

I’m so happy to have found NeoGenesis!” – BZ

SCAR

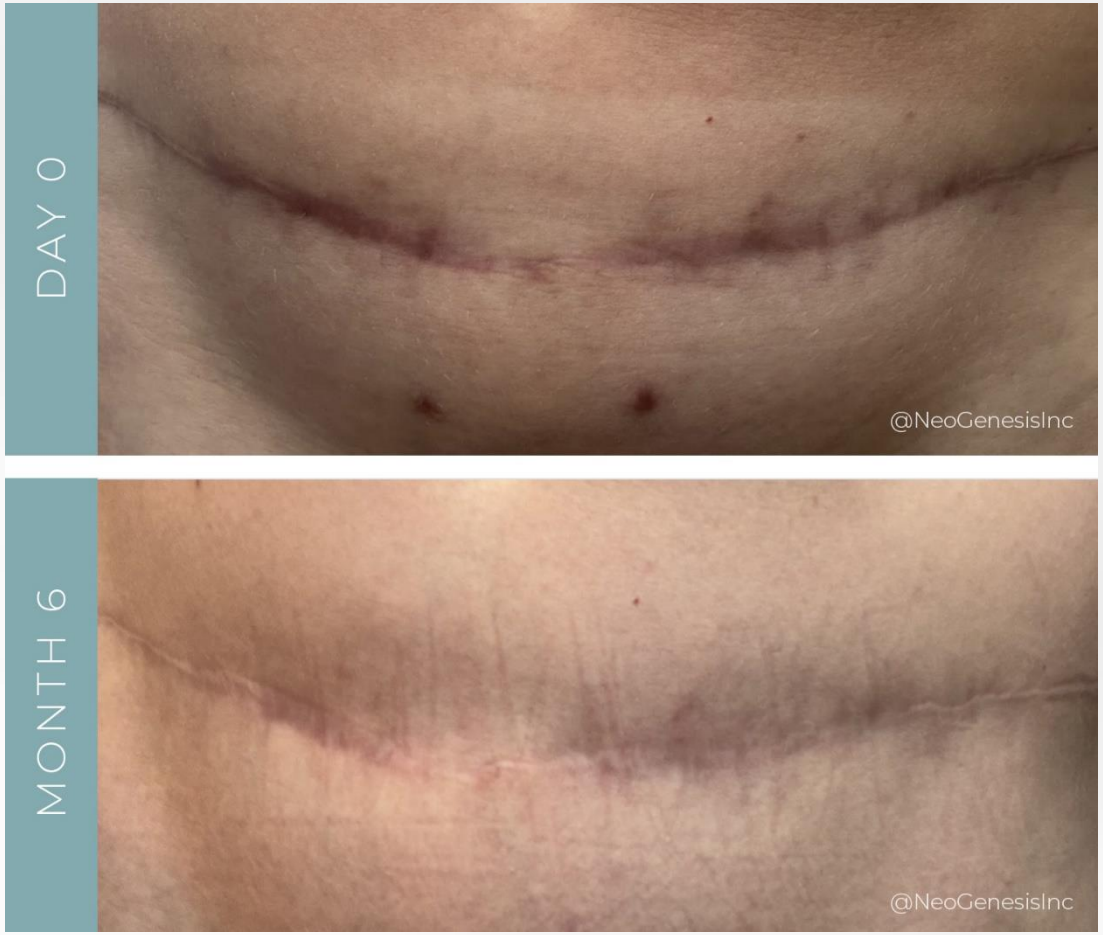

“My daughter had a good result with the Recovery.

She had a procedure to remove her micro-pigmented brows and the procedure did a lot of damage to the skin. She subsequently had it removed by laser but had some scarring from the initial procedure.

After about one month use of the Recovery, she had her brows re-done and no one would ever know that she had any scarring at all.” – NM

RECONSTRUCTION SURGERY SCARRING

"My client was diagnosed with breast cancer after her mother died of the same disease. She had a mastectomy in the beginning of January and they took the tissue and muscle from her belly for reconstruction.

5 1/2 months after surgery is when we started working on her scar. Five months later, the texture, border and color have improved significantly. She is thrilled!" – Christine Simmons (Preston)

SCAR

“I had a trach for eight weeks while in a coma from pneumonia. The trach was removed in early May.

I used Recovery every morning and night and after showers.

First photo is May 27th and second photo is November 4th. ” - GB

"The doctors removed a birthmark from my young client's forehead. She was only 12-13 years old. It left a scar.

The first week there was pressure and it felt like a hole was there. It was bumpy and still very visible and ugly.

After about 6 weeks there is just a little raised skin or a bump near the scar, but I could barely see the scar itself.

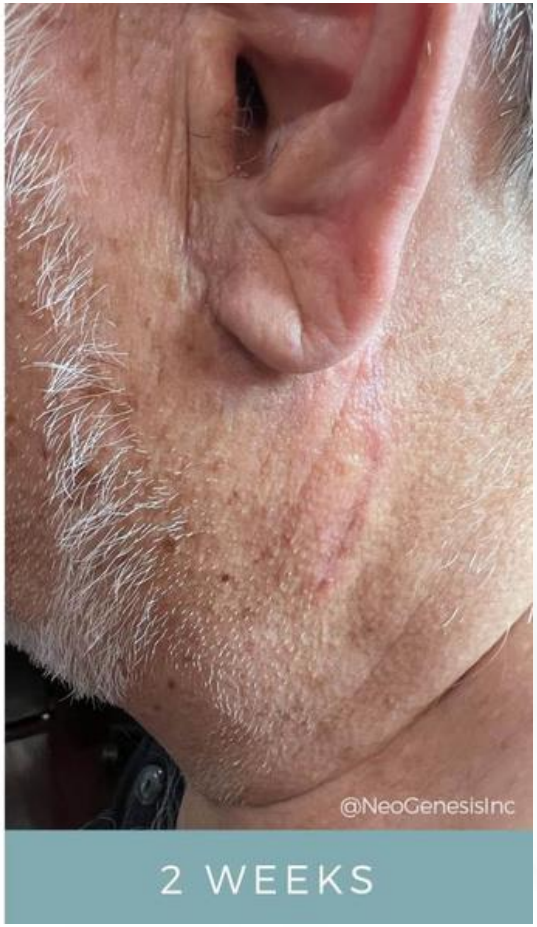

Recovery is such a great product! Glad I started her on it early. I actually started dropping it onto the wound over the steri strips. I didn't even wait for them to come off to start treating it."

SURGERY SCAR

"RC had surgery on Friday where they removed a cyst from his neck. It left him with some pretty nasty scars.

He is using Recovery serum, twice a day. The "after" photo was taken 2 weeks post neck surgery. He applied NeoGenesis Recovery twice a day, every day. Quite impressive."

"I had a second chance to "test" the product when a PET scan identified a benign tumor in the area of my left parotid gland, and I underwent surgery to remove it. The procedure left a nasty incision around my ear and extending an inch or so down to my neck. I applied NeoGenesis Recovery serum daily immediately post-surgery, and within a week my incision was hardly noticeable.

I'm very appreciative of the support we received from the NeoGenesis team -- Leila and Steve -- who checked in weekly, offering their guidance and expertise along the way and were always available for questions. Based on the success I experienced and the support we received, I strongly recommend the NeoGenesis products and team to patients and providers looking for a way to accelerate healing and reduce the discomfort associated with these aggressive treatments." - RC

SCARRING (ACNE)

"Our client struggled with acne as a teenager. It slowed down in his 20's and now he is in his 30's. He expressed that he has always been insecure about acne and his skin, and had been using ProActive.

To begin his treatment, I started him off with a facial and he started using Recovery serum. Within a week, he already noticed a difference in his skin. It was not as red and his wrinkles have gone down (for the past few years he started to notice wrinkles and bags under eyes). 2 months later, we began microneedling treatments, using NeoGenesis products. He likes the progress a lot. One thing he loves the most about the NeoGenesis products is that he has less wrinkles now, he breaks out less, his pore size is improving and the texture of his skin feels soft."

WOUND CARE + SCARRING

“While vacationing I had the unfortunate experience of slipping on a stone step which left me with a serious four-inch-long abrasion. It was extremely red and sore.

Thankfully, I had Recovery in my travel bag which I immediately applied to the area. I continued to use Recovery for the next few days.

Recovery helped significantly with the pain and literally saved my vacation. The scar is now completely gone!” - BZ

SCAR

“My client is 73 years young and has very thin skin. She walked into a door and the skin peeled back. The scar happened about 3 weeks ago and is elevated and very pink, but it does not hurt.

I started her on Recovery serum and Barrier Renewal Cream. She uses Recovery on and around the scar twice daily, and only uses 2-3 drops. She is using the Barrier Renewal Cream to help strengthen the skin.

As you can see from the “before” and “after” photos, the scar is almost gone completely in 3 months and the skin is so much better.”

- Estell Myers, Naturally Well Reno

SCAR (POST PREGNANCY)

“This client was treated for post pregnancy scar on lower abdomen*. Recovery serum was used on the scar with a dermaroller every other day for 5 months."

- Anna Rushing, Youthful Skin by Anna

Note: *the scar to the side of the navel is an old scar from a mole removed years ago and bonus part of this post pregnancy case study.

SCAR

“I am a 54-year-old woman who lives in sunny Florida. I have spent many dollars in plastic surgery procedures since 1998.

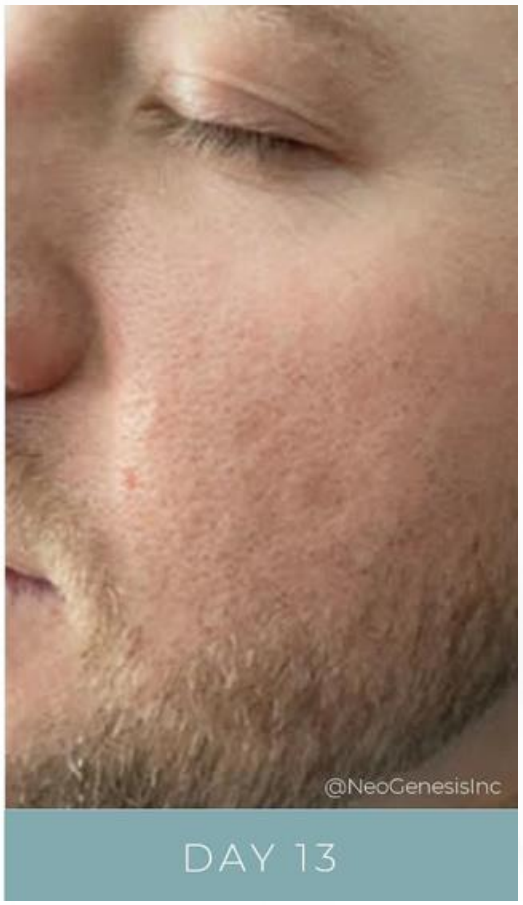

I received 3rd degree burns from the radio frequency skin tightening procedure at a skin spa in Miami. I had vertical scars that were deep. After efforts to use filler and scar removal I was desperate to find a solution! My friend recommended NeoGenesis so I called to inquire. They put me through to a licensed Esthetician with the company, who answered all of my questions and explain the benefits of stem cell technology.

After several months, the scars are nearly invisible; my skin is firmer and has a healthy glow. I found my answer after thousands of dollars and major issues with plastic surgery! Thank you! You are the best! I am loving this body cream!!!” - PP

SCAR

"Sending over photos from my client. He had laser treatment in April of 2021, to remove extended capillaries.

In my opinion, from knowing my client's barrier, the laser was high for minor area. Results were some minor scarring.

Since he's a Fitzpatrick 2/3, his scarring is very visible. He came in and we did a Hydration Facial, and I gave him Recovery serum to use on the area. Here's the before & after photos. The first was taken before he came in for a facial. The second is from 13 days later. I love the Recovery product!!"
